Dear Tara

Thank you very much for your wonderful donation.

The generosity of Disha has enabled us to purchase a Perkins Elma DNA Thermal Cycler. This vital equipment will be used to analyse DNA from patients with psychiatric illnesses.

The aim of the research being done using this equipment, is to identify genes that are involved in the cause of psychiatric illness and also to understand which genes to target to enable effective treatment response.

We are very grateful for your support and look forward to the Disha team visiting us to see the equipment and hear more about our work.

Yours sincerely
